

RIVERSO

From either side, endless possibilities.

The bidirectional sliding system
that redefines projects.

Innovating to solve

Riverso is a patented, two-way drawer system engineered to maximize space efficiency and enhance ergonomics across a wide range of residential, institutional, and commercial environments.

Your vision, powered by our expertise:
designs beyond expectations

Residential

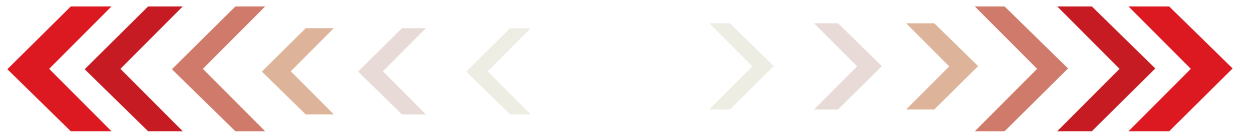

- > Perfect for kitchen islands, walk-in closets, and room dividers, Riverso improves circulation, simplifies access, and adds practical functionality to any living space.

Commercial

- > Ideal for jewelry stores and boutiques, Riverso combines sleek design and efficiency, offering quick and secure access from both sides. This enhances operational performance while improving the customer experience in any retail environment.

Riverso at a Glance

- > Bidirectional access
- > Silent soft-close
- > Concealed mechanism
- > Push-to-open option
- > European engineering

Hospitality & Food Service

- > Riverso promotes a smooth workflow, ensures quiet operation, and enhances the guest experience, while facilitating easy plate access for both kitchen and service staff.

Institutional

- > Whether in hospitals, rehabilitation centers, or senior residences, Riverso promotes user autonomy, reduces unnecessary movement, and increases service efficiency.

A wide range of applications

Riverso meets the highest demands by combining smooth operation, safety, and ergonomics in an innov-ative design.

One system,
endless possibilities

**Specialized environments:
pharmaceutical and
clinical laboratory**

> Simplifies work organization, improves staff efficiency, and speeds up access to equipment, while ensuring discreet and secure operation.
